Photo Shoot Details E-mail

Thank you for your interest in Jim's Photos! I'm a professional Madison area photographer and am happy with the prospect of working with you! I have some time available soon and have some ideas in mind. You are however more than welcome to come up with ideas of your own as well. You don't need to be an experienced model to do this - anyone can.

Photo Session I would like to plan a photo session with you sometime soon. I do both indoor and outdoor sessions. For outdoors, there are many places where we can go to do this. I favor any of the area Parks or Wis State Parks. Maybe Devil's Lake, Lake Kegonsa or Gov. Nelson State Park? Or I know some other good places that would be perfect for photos as well. Maybe you know a great place for this? This is your photo session so this can be pretty much anything you want to do. Styles can include: Art, Editorial, Fashion, Hair/Makeup, Back To Nature, Lingerie, Sassy/Sexy/Edgy, Boudoir, Fitness, Runway, Sports, Swimwear, Dance, etc. I'm into a more natural, relaxed look, keeping makeup on the light side. As for wardrobe, you can wear pretty much anything that make you feel comfortable. Nice bright colors will contrast well in the outdoors this time of the year. Variety is always good, so bring plenty of outfits, lingerie, and swim suits too. I use only the very best photographic equipment available and on-location studio lighting. Your photos will show strength, courage, determination, and confidence. My indoor photo sessions are described below which can be done in any season.

Considerations You will find that I am really laid back and easy going! The photo sessions are usually about 2-3 hours long. Each session includes at least 20 to 80+ finished photos which will be clear, clean and natural - professionally edited and color corrected to perfection. Sometimes additional sessions are needed to complete a project. This would be a TFP (Trade For Photos) session. We trade your time for mine. The process is easy, fun and there is no cost to you. You get to keep the finished photos from the session. Doing this helps me become a better photographer too. The digital files are suitable for web posting, etc. High resolution prints suitable for framing or posters are available from each session and sold separately. Any required signed photo releases and reservation/session fees (if applicable) are needed before any sessions begin. I will have a photo release form with me for you. Finished photos and videos are uploaded to your own personal gallery where you will be able to view and download your photos and also purchase any photo prints.

Summery If you haven't already done so, I highly encourage you to check out my web site: www.jimsphotos.com/model. There is a lot of useful info there that should answer most of your questions. Also, look for the link to my modeling portfolio. This will give you a better idea of the work I do. You may bring a friend along with you for the session. Perhaps she might be interested on a short photo session as well?

Indoor Sessions Many of you may desire having your photos done indoors. There are many reasons to do this. Weather, privacy and the ability to control the lighting and other environment are some reasons that come to mind. These sessions are easy and fun too. Most are done at a local hotel room, a photo studio (when available) or your own home. Please inquire for more details.

Under Water Photos (When in season) Do you enjoy the water? In addition to traditional photo sessions, I do underwater sessions as well. There is how my underwater photo shoots work. I have an underwater camera set-up that is designed to work with only one person in the water - you! I designed a small "floating" rig so the camera can hang about 12-18 inches below the surface of the water. It has a wide angle lens and additional lighting so it well capture your underwater movements very easily. You don't have to be a swimmer to do this. Most of my underwater sessions are done at Devil's Lake which is one of the clearest lakes in Wisconsin. I also have access to a large warm indoor pool for this as well.

Photos In The Snow (When in season) Winter in Wisconsin presents a unique opportunity. We have snow! And there are days where its warm enough to do portrait photos in a snowy environment. Where are many places we can go to do this. And there ways to keep warm while doing this as well. I have some colored lights to really make this a festive photo session!

Photos In The Rain (When in season) **New!** Have you ever thought about having your photos done in the rain? I have created a "Rain Machine" that shoots water drops up in the air. This allows persons to pose either behind, in front of or directly under the many drops of water falling down. There are lots of very cool effects that can be done with this! I also have other ideas and props as well.

There are time slots available for your photo session, so please pick a date and time that works best for you! I look forward to meeting and working with you soon! Thanks for your consideration!
